

XY Calibration Test Pattern - pdf2printer

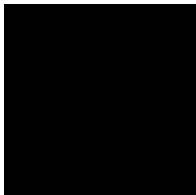

Print at 100% scale, no auto-fit / no auto-center in slicer or UVtools.

Measure each shape with a caliper and compare to the nominal value below it.

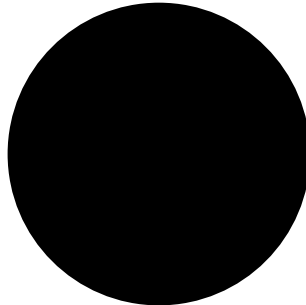

Use the ratio (measured / nominal) to correct disp_w / disp_h in the printer preset.

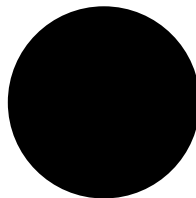

10 x 10 mm

25.4 x 25.4 mm (1 inch)

d = 40 mm

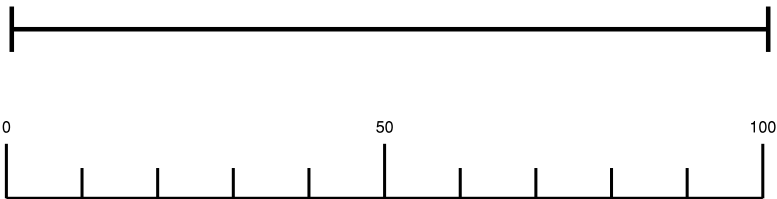

d = 25.4 mm (1 inch)

d = 10 mm

100 mm line - X axis

10 mm graduated ruler (0-100 mm)

Nominal dimensions above are exact vector values embedded in this PDF.

Any deviation on the printed/cured part is due to printer optics, LCD size tolerance, or resin light-bleed - not to this file.

100 mm line
